Project Features

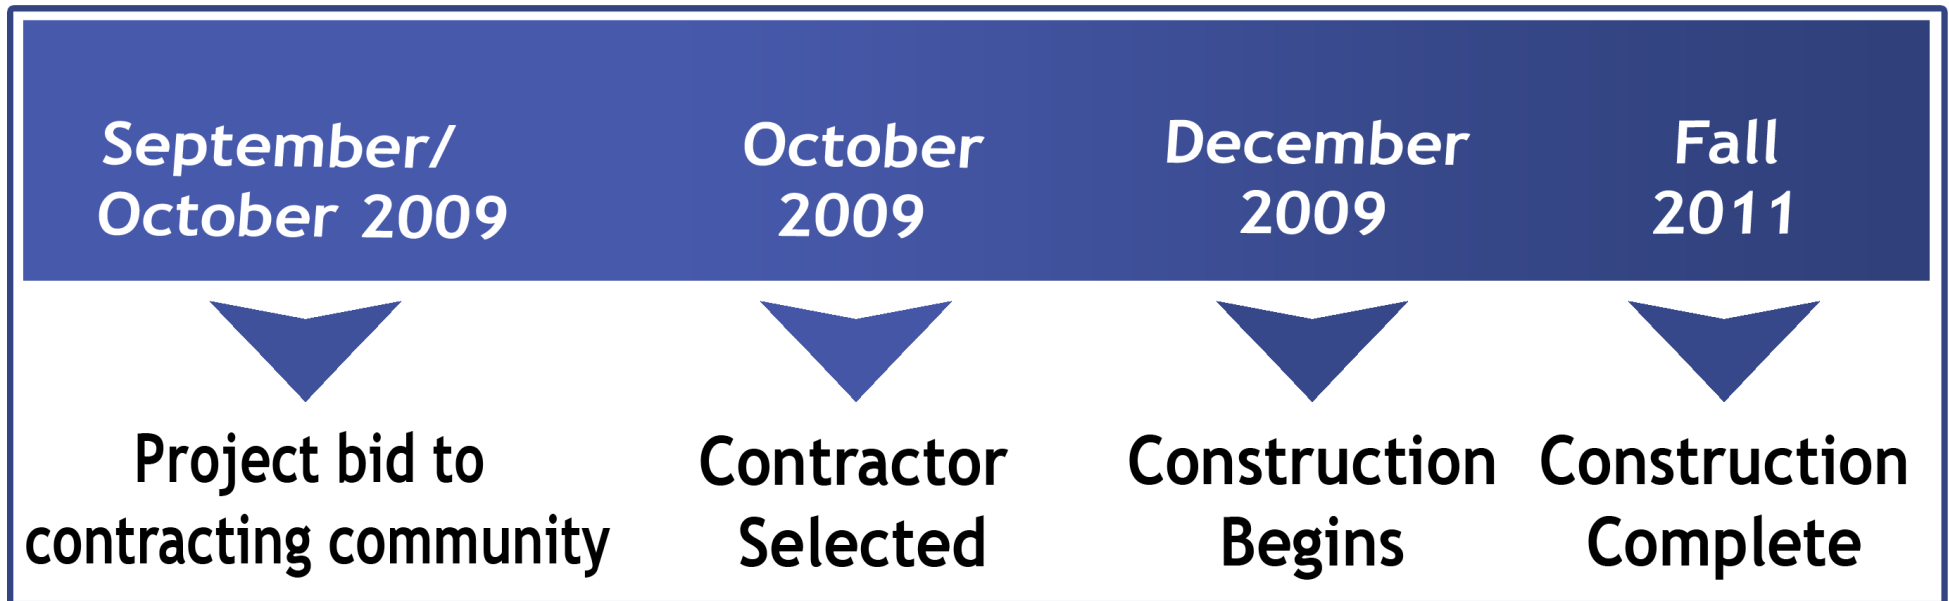

UTAH COUNTY
2100 NORTH

Construction Schedule

UTAH COUNTY
2100 NORTH

*** Contractor will determine construction schedule details following selection*

Construction Impacts

UTAH COUNTY
2100 NORTH

Detours - During construction of the UTA and Union Pacific rail bridges, 2100 North traffic will be detoured south to 1700 North and east to State Street

Noise & Dust - While UDOT monitors these types of impacts and works with the contractor to mitigate them, area residents should expect some dust from earthwork and noise from construction activities

Traffic Delays - During work at the 2100 North interchange, motorists should expect some minor delays

Utility Outages - Notice will be given in advance of planned utility outages

UTA and MVC, 2100 North – Project Coordination

UTAH COUNTY
2100 NORTH

The UTA and UDOT MVC, 2100 North project teams will work together throughout construction to minimize impacts and coordinate schedules. Each project has a dedicated public information team to keep residents informed. Go to www.rideuta.com/projects/commuterRailSouth for more information on the Frontrunner South project.

- The new Frontrunner South line will cross 2100 North just west of I-15
- The UTA & Union Pacific rail bridge will be built at-grade and 2100 North will run beneath it

Public Information & Resources

UTAH COUNTY
2100 NORTH

UDOT has employed a project-dedicated public information team to address public questions, concerns and issues. Let us assist you through the construction process.
